TORSE

The TORSE shoulder straps allow the CROLL ventral ascender to remain correctly positioned, in order to optimize efficiency and comfort during rope ascents when caving. The buckles adjust quickly to ensure positioning on the harness. The simple and rugged construction makes the straps extremely durable.

Short Description Shoulder straps for positioning a CROLL

Selling Points

- Efficient and easy to use during rope ascents:
 - simple construction
 - allows efficient positioning of a CROLL ventral ascender for rope ascents
